

We offer complete Electrical Asset Management.

Check out our web site at emcsolutions.com & cwsilver.com

Five Reasons to Choose C.W. Silver for your Motor Repair Needs:

1 Vacuum Pressure Impregnation (VPI)

- Creates tighter binding of windings & insulation
- Ensures better heat transfer & protects against contamination

2 Core Testing Before and After Controlled Burn-out

- Maintains motor efficiency
- Makes sure rotor bar integrity is intact

3 In House Machine Shop & Balancing

- Controls cost & quality and saves less time because we do it ourselves

4 Vibration Analysis on Test Panel

- Insures that all parts are balanced properly
- Confirms that bearing quality is maintained
- Vibration analysis on final test up to 4160V

5 After Repair Services

- Scheduled Maintenance Contracts
- Onsite Installation & alignment
- On-site training
